I wanted to share with you the final report completed by NAU and funded through NLCS Research Support Program. Thanks to the continued efforts of Kevin Miller for signing this project through completion.

The report title is "Toward an integration of historical and contemporary data to inform assessment, monitoring, and decision-making on the Grand Staircase-Escalante National Monument" and it evaluates some of the range data collected over the years.

The report is saved here Z:\Science Program\Science 1\Research Projects\NAU AIM and attached for those not on our network.
